

RUSHCREEK TOWNSHIP TRUSTEES
EMERGENCY MEETING
08/05/15

On August 4, 2015, while HVAC Mechanical was installing the HVAC unit at the fire department a strong odor of gas was discovered. Trustee Hart Van Horn was present overseeing the installment with Chief Duvall on duty. Work was immediately stopped and a license plumber, Gilbert Plumbing of Lancaster was contacted to evaluate the situation. The plumber arrived on August 5th at 8:30am to inspect the gas line. The plumber indicated the severity of the problem could require a very large expense because the current gas line is not plumbed properly. Due to this emergency the other two trustees were contacted for a site inspection. Connie was also contacted however was unable to attend since she was in New Lexington in court with Conservancy District business. No decisions were made however information was gathered to be discussed at the regular meeting scheduled on August 5, 2015 at 7pm.
